PROPOSED SOLUTION

- As of now they are using whats app only to send the image of the cosmetic items and through phone call only they are making the orders.
- In this technological world doing a business in this manner is tedious process.
- So we are going to develop a website for booking the orders.
- As well as the customers can view the cosmetic items available for rent and they can make the order and pay their amount through the website itself.
- They can also book their slot for bride/groom makeup.
